A framework for Managing Explainability Requirements in AI-Based System: Evaluation

Dear participants,
Thank you for your time, and we truly appreciate your participation. This survey is designed to gather valuable insights and will take approximately **10 minutes to complete**. Before filling it out, we kindly ask that you spend about **10 minutes reviewing the provided framework**, which will help guide your responses and ensure clarity. Your input is crucial and will contribute meaningfully to our work.

We recommend inspecting the framework again before filling out the questionnaire. The framework is accessible via the following link:

https://docs.google.com/presentation/d/1BcXJTLZ7a3b0IEI3eQnme8NMV8ia-CeZYV5_3Qs8u9k/edit?slide=id.p#slide=id.p

The objective of this questionnaire is to evaluate the **Explainability Requirements Framework (ERF)**. It **guides practitioners** through the elicitation, specification, and validation of explainability requirements in AI-based systems.

What the framework provides

1. **Structured guidance.** The ERF enumerates the essential activities, artefacts, and decision points necessary to capture explainability requirements in a traceable and reproducible manner.

2. **End-to-end coverage.** The framework spans the full requirements life-cycle elicitation (identifying stakeholder-specific explainability needs), specification (formalising those needs in verifiable terms), and validation (confirming that implemented solutions satisfy the stated explainability goals).

3. **Scenario sensitivity.** The ERF recognises that explainability is context-dependent. Practitioners are therefore encouraged to calibrate each activity's depth and rigor to the criticality, risk profile, and maturity level of the target system.

4. **Adopt-and-adapt philosophy.** While the steps are presented as a coherent baseline, they are deliberately technology-agnostic and may be re-ordered, merged, or extended to fit domain-specific constraints, regulatory obligations, or organisational culture.

How to use this questionnaire
Answer each question with reference to your own professional experience: Where prompted, cite specific projects or organisational practices.
Indicate modifications you deem necessary: Because one of our goals is to understand how the framework can be improved, feel free to recommend deletions, additions, or re-sequencing of activities.

Confidentiality and Anonymity Statement: We do not collect any personal data. All information you provide will remain confidential within the

research team, and results will be fully anonymized before publication.

* Required

Perceived Usefulness

1. After reading the framework, I know what it's for. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

2. The framework helps me handle explainability requirements in AI projects **faster**. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

3. The framework **increases my productivity** when eliciting explainability requirements. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

4. The framework **increases my productivity** during requirements specification. *

	Strongly agree	Agree	Disagree	Strongly disagree	Neutral
Statement 1	◯	◯	◯	◯	◯

5. The framework makes the explainability-requirements task **easier** to carry out. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

6. Overall, I find the framework **useful** for handling explainability requirements in AI projects. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

Perceived Ease of Use

7. **Learning** to apply the framework was **easy** for me. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

8. Interacting with the framework's steps is **clear and understandable**. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

9. Are the phases and activities **logical and intuitive**? *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

10. I find the framework's activities **easy to recall and apply.** *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

11. **Overall, the framework is easy to use**. *

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Statement 1	◯	◯	◯	◯	◯

General Feedback

12. To what extent did the framework address your previously identified challenges or gaps in managing explainability requirements? *

13. Would you apply this framework within your organization or workflow? *

14. What aspects of the framework stood out positively to you, and why? *

15. Here, you can leave other feedback and remarks.
